Hey, I am Killian Debacker a full-stack software developer. I love to code. If you like any of my projects, check them out on GitHub and consider contributing.

Work Experience

LMS Project (2020-06 – Current) Associate Application Developer

Vue, PHP(Symfony), MySQL

(A platform for construction project management, invoicing, budgeting, payments, and more.)

- Developed automated check creation cutting the delivery date of checks in half.
- Developed robust check monitoring and reconciliation.
- Built report generation for invoices and payments to allow a user to track projects.
- Built internal tooling API's and Vue pages for project monitoring and analytics.

Programming Projects

Goal Tracking and Planning Website

React, C# (.NET, ASP.NET) SQL

- A website to help track a user's goals and plans over long periods of time.
- Implemented multiple pages and views without the need to reload the page.
- Implemented a RESTful API for Registration/Login with ability to create, maintain, complete, and delete goals.
- Find more information and the source code on my GitHub. Live Preview: <https://goal-tracker.killiandebacker.com/>

PyMusic

Python (PyQT)

- A desktop MP3 player to manage and play music.
- Implemented features such as play, pause, next song, and ability to add songs to playlist.
- Find more information and the source code on my GitHub.

Education

Dakota State University (2020-06 – 2021-5)

- Computer Science - Senior
- 3.58 GPA

Programming Languages (Libraries/Frameworks Used)

CSS (SCSS)	Javascript (React/Vue)	SQL (MySQL)
PHP (Symfony)	Go	C#

Related Experience

Git	Docker	RESTful
MVC	Relational Databases	Github/Gitlab
